Search Products

Search By Category Search By Item Code

Category: Ex: BB10Mar Ex: 21% Ex: Replenishment Schedule Ex: 5 Days Countdown Brand: SOQ = 0 Search

Class A				Class B				Class C			
QF	LT	BS	TargetQty	QF	LT	BS	TargetQty	QF	LT	BS	TargetQty
00	00	00	10	00	00	00	00	00	00	00	00

- Users can upload an excel file for Bulk PR creation or Manually create a PR
- Filtering of products can be done via category filters or by explicitly providing a product code.
- The replenishment API in the `ProductCommandController` gives us a list of filtered products
- The products are classified into three classes based on the three categories, Class A, Class B and Class C

Price Per Unit: Price Per Unit: IDR Per: 0 UoM-PC

Optional Inputs

+ Add Warehouse

Done

- After selecting the required items and entering the required details, the user can purchase stock for multiple warehouses
- After this, the PR document would be in the Draft state
- The TP must then send this document for approval to the DPIM user
- TP can indefinitely add more products and save drafts as they like
- After sending for approval, the status would be In Review
- The document can be approved or rejected by the DPIM user
- During rejection the user can decide to send back the document with remarks for the TP to review it.
- After Approval, the state would be Reviewed, the PO is created once the PR is downloaded.
